Please read the prospectus in its entirety, before investing, for complete information and to learn more about the risks associated with this offering such as:

- Shares of our common stock are illiquid. No public market currently exists for our shares, and our charter does not require us to liquidate our assets or list our shares on an exchange by any specified date, nor does it ever require that we provide a liquidity event for our shareholders. If you purchase shares in this offering, it will be difficult for you to sell your shares, and if you are able to sell your shares, you will likely sell them at a substantial discount.
- We set the initial offering price of our shares arbitrarily. It is unrelated to the book or net value of our assets or to our expected operating income.
- We have no operating history, and because we have not identified any investments to acquire with offering proceeds, we are considered to be a "blind pool." You will not have the opportunity to evaluate our investments before they are acquired.
- We are dependent on our Advisor and its affiliates to select investments and conduct our operations and this offering. Adverse changes in the financial condition of our Advisor or our relationship with our Advisor could adversely affect us.
- There are substantial conflicts of interest regarding compensation, investment opportunities and management resources among our Advisor, our Sponsor, our affiliates and us. Our agreements with our affiliates were not determined on an arm's-length basis and may require us to pay more than we would if we exclusively dealt with third parties.
- This is a "best efforts" offering. If we are unable to raise substantial funds then we may lack diversification in our investments.
- We expect to incur debt, which could adversely impact your investment if the value of the property securing the debt falls or if we are forced to refinance the debt during adverse economic conditions.
- Our charter permits us to pay distributions from any source, including from offering proceeds, borrowings, sales of assets or waivers and deferrals of fees otherwise owed to our Advisor. As a result, the amount of distributions paid at any time may not reflect the performance of our properties or our cash flow from operations. Any distributions paid from sources other than cash flow from operations may reduce the amount of capital we can invest in our targeted assets and, accordingly, may negatively impact your investment.
- There is no guarantee that we will pay distributions at any particular level, or at all. If distributions are declared and paid, the amount of the distributions paid may decrease or distributions may be eliminated at any time. Due to the risks involved in the ownership of real estate, there is no guarantee of any return on your investment, and you may lose all or a portion of your investment.
- If we fail to qualify as a REIT, the amount of income available for distributions to be paid to you will be reduced.
- We pay substantial fees and expense reimbursements to our advisor and its affiliates. These fees and reimbursements were not negotiated at arm's length and therefore may be higher than fees payable to unaffiliated parties.
